

MARGARET RIVER TOURS COVID-19 SAFETY PLAN

The Western Australian Government has announced that as from January 31st, 2022, patrons over the age of 16 will be required to provide proof of being fully vaccinated against Covid-19.

All Margaret River Tours staff are fully vaccinated against Covid-19 and are required to be up to date with their booster shots.

Adam Betar, owner of Margaret Rivers Tours, has successfully completed the AHA Hospitality & Tourism COVID-19 Hygiene Officer Course and will be applying these protocols to the day to day running of tours. In summary they are as follows.

If you are feeling unwell, (particularly with flu-like symptoms) please cancel your booking and we will give you a refund less the credit card surcharge and Rezdy booking fee.

If you are displaying flu-like symptoms on our tour, we reserve the right to cancel your tour and return you to your accommodation.

In addition to QR code check-in, we will request the full name and phone number of each guest which will be held by Margaret River Tours for 4 weeks in accordance with the requirements of the COVID-19 mandatory contact register protocol.

Our vehicles are always thoroughly and hygienically cleaned before every tour and we will do a safety briefing at the commencement of each tour.

We ask our customers and drivers to maintain social distancing when possible and to respect our winery partners' requirements and protocols.

Our cheese and antipasto platter is served in individual, disposable packaging. Hand sanitizer will be provided for our customers and guides to use throughout the day.

We thank you for your cooperation and look forward to providing you with a safe and fun day tasting the best of Margaret River's premium food and wine.

Cheers,
Adam Betar
